

Assumptions Made:

1. A minor's minor status can and will be calculated from their date of birth, and does not have to be saved as an attribute.
2. A passenger's phone number will always be provided if they are not a minor, and a minor's guardian's phone number does not have to be recorded separately.
3. A guardian's phone number can be automatically retrieved from a passenger's phone number.
4. A passenger will only have one principal spoken language.
